

PROPER PRESENTATION IS ESSENTIAL!

All 2-dimensional work must be framed and wired across the back. Without this the work cannot be hung securely

Many frames come with a saw-toothed bar or small loop at the top.

These will NOT be acceptable.

Unframed paintings must be finished on edges and with wires attached to stretchers on back.

If the frame is wood, use 2 screw eyes to secure the wire across the back.

Wire should be attached 1/3 down from the top of the work.

For questions regarding wiring, please email gallery@artleagueli.org.
